# Music SQL Database

REVIEW

HISTORY

## Unable to review

Your project could not be reviewed. Please resubmit after you address the issue noted below by the reviewer.

Hello Udacity Student,

This submission could not be reviewed due to error in the `sql` queries. The table name used is not found, please be sure to check out that. Moreover, it would be interesting if you can put all the queries in a single `.txt` text file and make the queries as simple as possible. Be sure to remove in line comments in the queries. The slides were very good by the way. Have a nice day!
