Music SQL Database

REVIEW

CODE REVIEW 4

HISTORY

Meets Specifications

Dear Student,
I really enjoy reviewing your work. Your project is really nice and professional. Keep going writing high-quality projects!

SQL Queries

✓

All SQL queries run without errors and produce the intended results.

All your queries were really cool , congratulations

✓

Each SQL query needs to include one or more explicit join. The JOIN or JOINS should be necessary to the query. If a question does not require a JOIN please change the question to be one that does.

Example:
SELECT *
FROM Album
JOIN Track on Track.AlbumID = Album.AlbumID

Great job, nice use of JOINS in every query.

✓

Each SQL query needs to include one or more aggregation. This could be a COUNT, AVG, SUM, or other aggregation.

Perfect All SQL queries include one or more aggregation clauses.

✓

The student has used at least 4 unique SQL queries in their submission.

Correct you have used at least 4 unique SQL queries with corresponding visualizations, in your submission.

Presentation

✓

Each slide should have an appropriate title and the visualization descriptions should be free of significant factual, spelling and grammar mistakes.

The slides have appropriate titles and the visualization descriptions are really good.

✓

All visualizations should make logical sense and provide accurate information about the indicated area.

I really like your insights and your visualizations. Keep going this way!

✓

All visualizations include a title and axis labels, have a legend where applicable, and are easily understood.

Every visualization should have

- chart title
- x axis title
- x axis labels
- y axis title
- y axis labels

The titles and labels were properly included and clear. Please, include in the slide No. 1 the x axis title to save a successful record of your project.

Submission Phase

✓

A PDF report has been uploaded and a .txt file with the queries has been uploaded in a single zipped folder file

Perfect submission phase, thank you.
